Entity Relationship Diagram (ERD)

December 2015

Information is Confidential to T2 Systems. RECIPIENT will not disclose Confidential Information to any person, firm or corporation, will not use Confidential Information for any purpose other than the furthering of its business relationship with T2 Systems, and will not permit any person or entity within their respective organizations to make any disclosure or use of Confidential Information which would be prohibited by the terms of the Confidentiality & Non-Disclosure Agreement.

Instructions

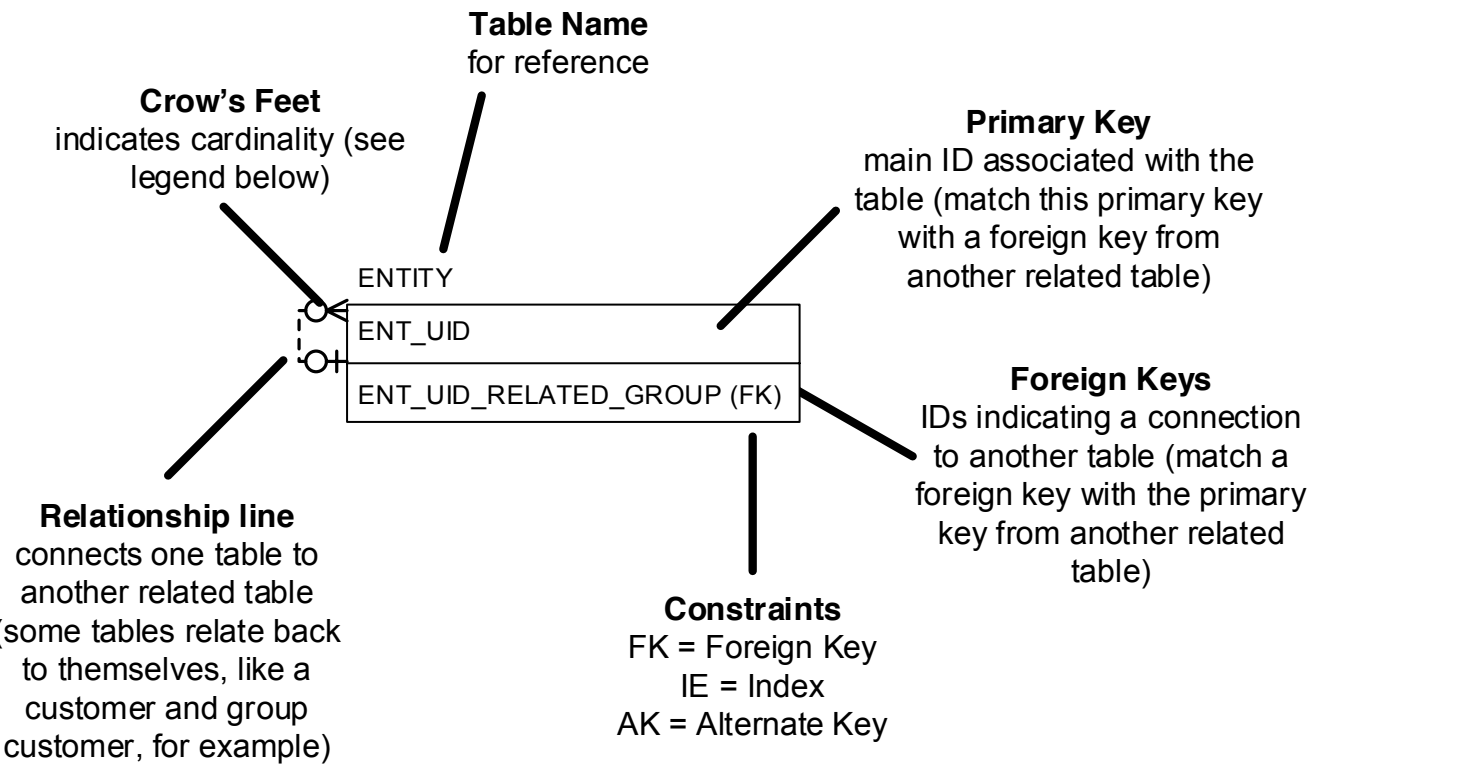

This ERD includes a selection of T2 Flex tables most commonly used for report and query writing. Not every table in T2 Flex is represented here. If you do not see a table you need, you can access your T2 Flex database directly using a standard database analysis tool (Oracle SQL Developer, Oracle Enterprise Manager Console, TOAD, Visual Studio, etc.). T2 Flex Online Help also includes a list of common table IDs needed for financial and other reports. Contact T2 Support for assistance.

Tables represented here:

- ACTIVITY_LOG
- ADJUDICATION (Appeal)
- ASSET
- BOOTTOW
- CASHDRAWER_SESSION
- CON_PREPAID (Prepaid Citation)

Example

The example below identifies the different elements of the Entity (Customer) table. In order to find the connection point between two tables, match the foreign key from one table with a primary key from a related table.

Cardinality Legend

The symbols on the ends of each relationship line indicate the cardinality (numeric relationship) of those two tables.
